About our products

ECO series of advertising racks without fasteners.

Design and Production: Complete service for the creation of advertising racks made of plywood and wood.

We produce a standard series of advertising racks **without fasteners**, which allows for ordering minimum quantities of one piece and extremely **advantageous prices** for the production of **larger series**.

What makes a difference here is the collaboration between the plywood and the typical assemblies that give our racks remarkable appearance, natural and contemporary design without compromising on their **strength and quality**.

Upon receipt, each rack represents a flat package which means **lower transport costs**.

We know that you are looking for distinctive advertising items, so we offer different **branding**, colour treatment options, and other subtleties that we will discuss together during the production of your racks!

You make the choice, and we guarantee its success!
